\* First line of data in the table for each station is mean evaporation in inches; second line is the number of years of record per month; and third line is the coefficient of variation in percent (computed only where there are 10 years or more of record during 1956-1970).

\*\* Climatological Data (NOAA-EDIS)

\*\*\* Sum of monthly means.

\*\*\*\* Insufficient data between 1956-70 to compute the coefficient of variation.
